Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment is made of the receipt and entry of the amendment filed on June 23, 2004. Further acknowledgment is made of the receipt and entry of newly submitted Claims 17-20.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10 and 12-16, drawn to a composition based on plant extracts with an useful for the treatment of adiposity and cellulites in humans comprising: biflavones of *Ginkgo biloba*, catechin and/or epicatechin, cumarin or derivatives thereof, iodine and a component chosen from among madecassic acid, asiatic acid, asiaticoside and mixtures thereof.

Group II, claims 17-20, drawn to a method for treating adiposity and cellulites in human comprising administering to a human suffering from adiposity and cellulites an effective amount of a composition comprising a flavone dimmer.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 17, at least, is anticipated by or obvious over WO 97/17056 because Fabre et al. teaches a method of treating cellulite comprising the administration of a composition comprising an extract of *Viburnum* containing amentoflavone.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Art Unit: 1654

The species are as follows:

1. Embodiments wherein the composition comprises a catechin and/or epicatechin.
2. Embodiments wherein the composition comprises cumarin or derivatives thereof.
3. Embodiments wherein the composition comprises a component chosen from among madecassic acid, Asiatic acid, asiaticoside and mixtures of these.
4. Embodiments wherein the composition further includes flavonol glucosides and lactonic terpenes
5. Embodiments wherein the composition further comprises a compound chosen from the group consisting of methylxanthinic derivatives, chlorogenic acids, mono- and di- caffeylchinic acid and derivatives thereof, eicosapentaenoic acid, docoheptaenoic acid, gamma-linolenic acid and mixtures thereof.
6. Embodiments wherein the composition comprises either *Melilotus* and/or *Aesculus hypocastanum* extract.
7. Embodiments wherein the composition further comprises one or more of the following: an extract of *Ilex paraguariensis*, artichoke extract, fish oil, and borage oil.
8. Embodiments wherein the composition further comprises one or more of the following: caffeine, caffeilchinic acids, eicosapentaenoid acid, docoheptaenoic acid and gamma-linolenic acid.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1654

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claims are generic: Claims 3 and 9.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Claim 17 is anticipated or obvious over WO 97/17056 because Fabre et al. teaches a method of treating cellulite comprising the administration of a composition comprising an extract of *Viburnum* containing amentoflavone.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
